

**Replication files for Projective Paternalism**  
**Sandro Ambuehl, B. Douglas Bernheim, Axel Ockenfels**

Instructions

1. Open "doFiles/projectivePaternalismAnalysis.dta"
2. On the first line, enter the path of folder in which this README file is located.
3. Run the file to generate all graphs and tables,

Notes

- The tables are generated with `outreg2`. You may have to type "`ssc install outreg2`" if you have not installed that package yet.
- The script produces all graphs and tables in the document. Numbers that are mentioned in the main text that are not part of a table are also generated by this script. The corresponding lines in the code are highlighted.

To replicate the analysis in Appendix C (Vignette experiment), run the do-File "`appendixSurvey/doFileAppendixSurvey.do`"
