

Errata Sheet

Date	Data Files	Data Element	Modification
19-Dec-14	2013	Race	Variables Race and Hispanic Origin are not available in the 1st release due to the delay associated with collection of these variables. However, these variables will be made available in the next (Final) data update.
		Hispanic Origin	
20-Jun-14	2005	Airbag Availability / Deployment	Maryland case number 274 in 2005 file has been updated to correct the coding of the AIRBAG AVAILABILITY / DEPLOYMENT variable.
6-Nov-09	2001-2008	Latitude	New format - Decimal degrees (ddd.dddddddd)
		Longitude	
25-Mar-10	1999-2008	Drunk Drivers Accident Level	<p>The DRUNK_DR element on the ACCIDENT level has been incorrectly derived since 1999. Since then, it was derived based on all person types rather than based on Drivers only. Furthermore, the variable name (DRUNK_DR) implies that the individual was drunk, however, it actually captures those individuals whom the police reported alcohol involvement OR who tested positive for alcohol (i.e. their blood alcohol concentration was .01 g/dL or greater). Please note that beginning with the 2008 Final file, which will be released in the summer of 2010, DRUNK_DR will be derived for Drivers only. These are the criteria used since 1999:</p> <p>(1) <u>All person type:</u> MOTORISTS 01 Driver of a Motor Vehicle In-Transport 02 Passenger of a Motor Vehicle In-Transport 09 Unknown Occupant Type in a Motor Vehicle In-Transport NON-MOTORISTS 03 Occupant of a Motor Vehicle Not In-Transport 04 Occupant of a Non-Motor Vehicle Transport Device NON-OCCUPANTS 05 Pedestrian 06 Bicyclist 07 Other Cyclist 08 Persons on Personal Conveyances 10 Persons In/On Buildings 19 Unknown Type of Non-Motorist</p> <p>(2) <u>Alcohol involvement = yes</u> (3) <u>Alcohol test result between 1 and 94</u></p>
			(*) On 06/20/2014, Maryland case number 274 in 2005 file has been updated to correct the coding of the AIRBAG AVAILABILITY / DEPLOYMENT variable.
